BEFORE YOU ADD ANOTHER AGENT, CHECK WHAT IT ADDS.

A follow-up to “AI said Fixed.”

"FIXED" IS A CLAIM.

Checks bring evidence.

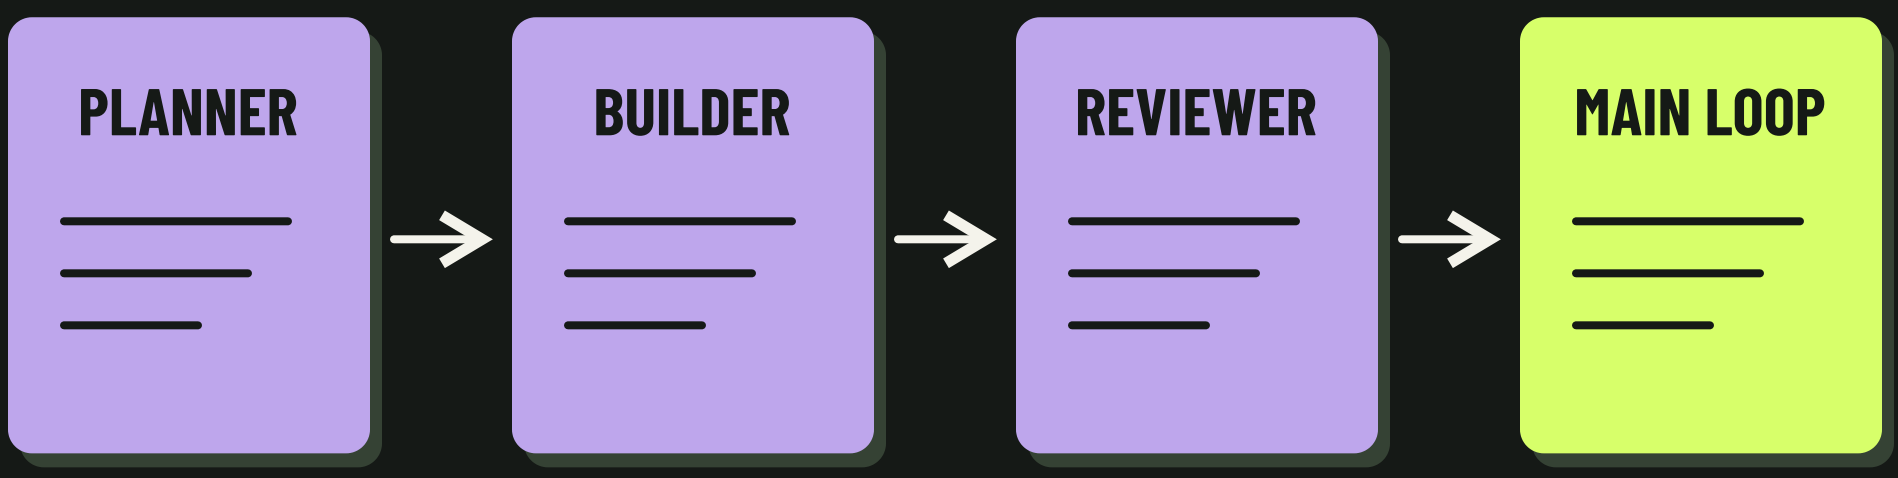

ILLUSTRATED CALLBACK

Adding an agent is a design choice.
Its value still needs evidence.

EACH HANDOFF NEEDS CONTEXT.

What survives the next summary?

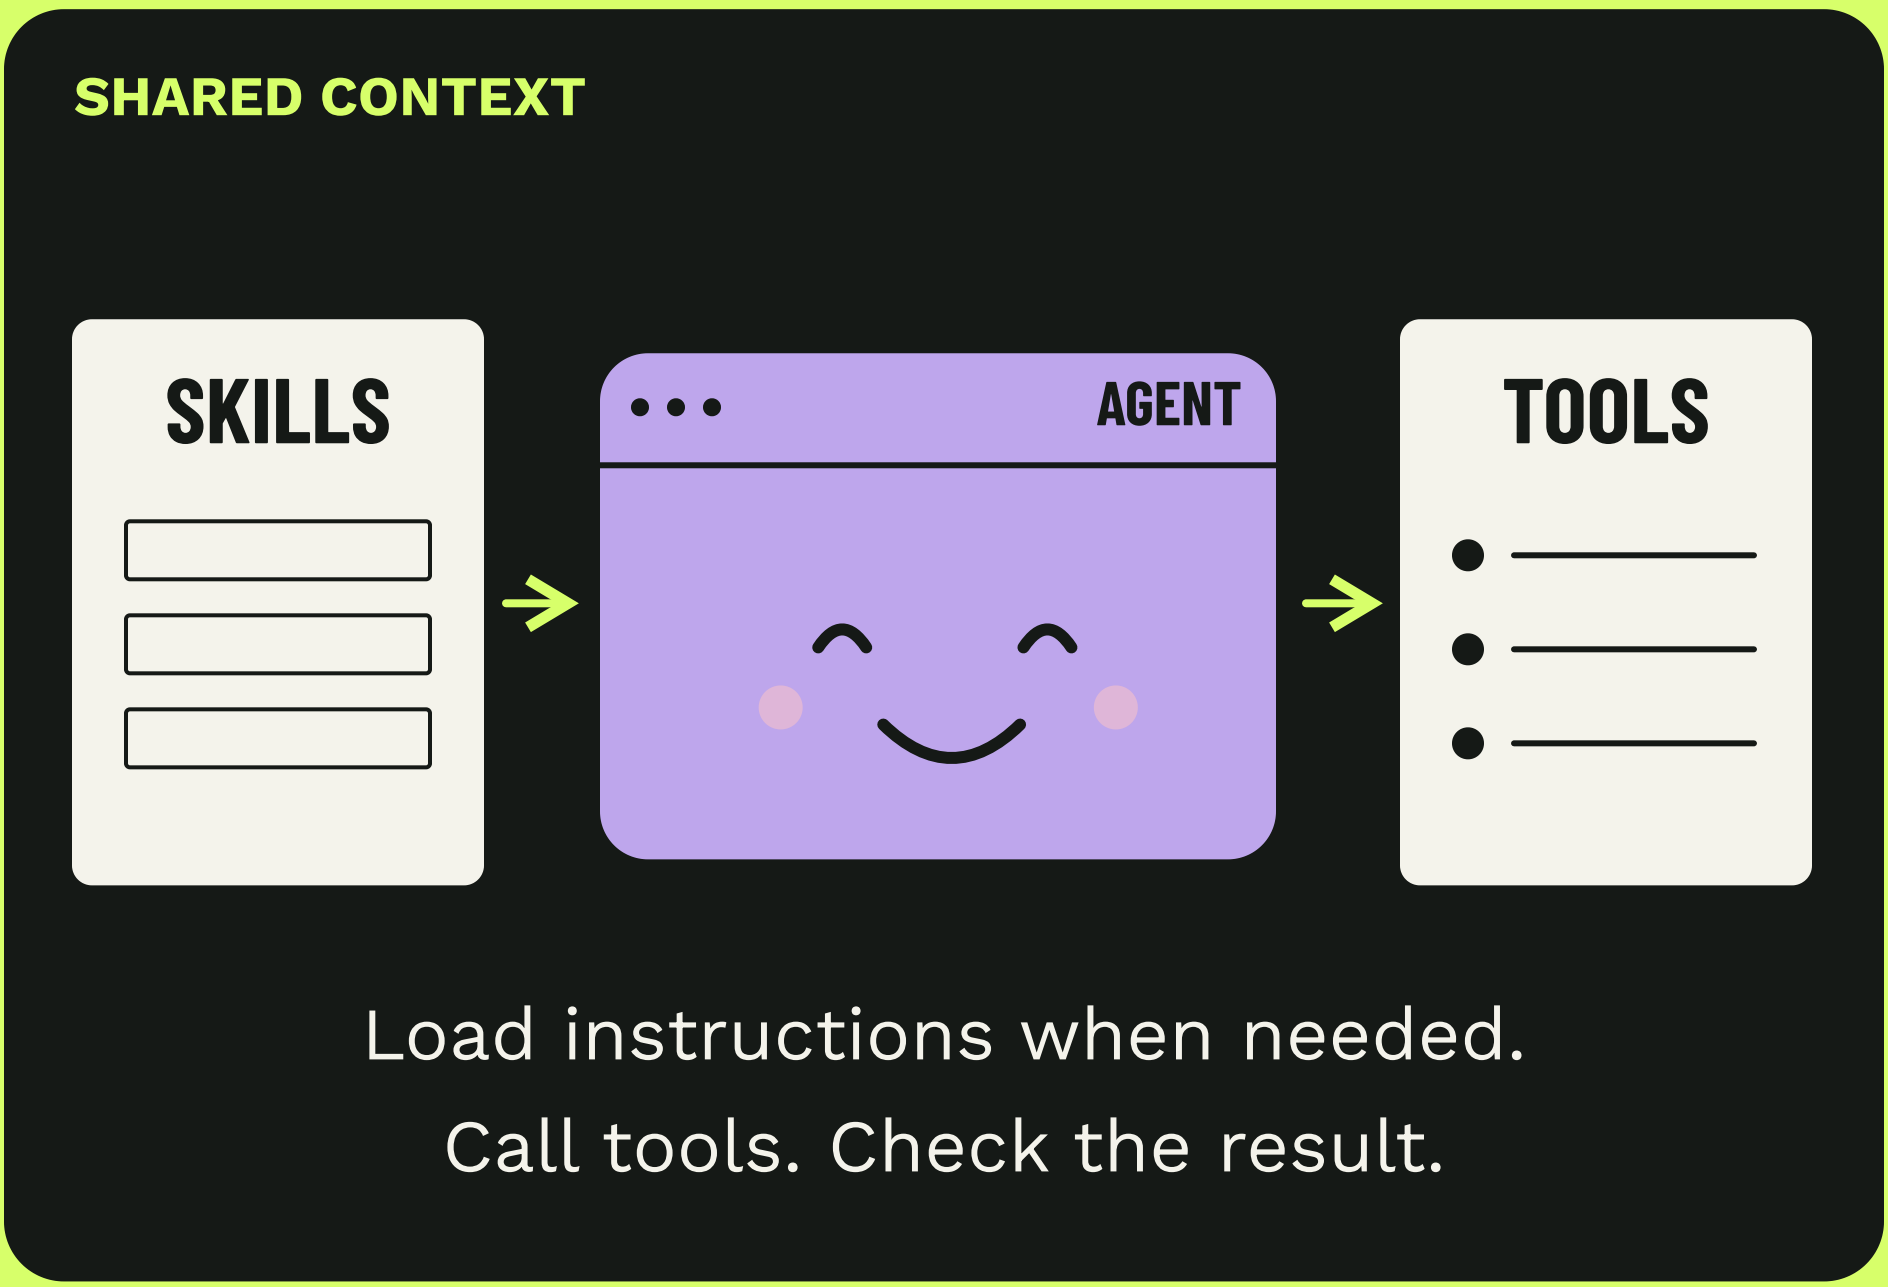

Details can get lost.

Extra calls can add latency.

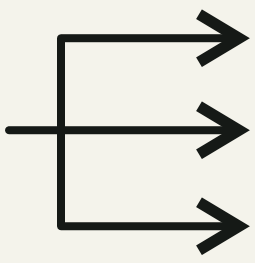

Test fewer handoffs on the same tasks.

ONE AGENT. SEVERAL SKILLS.

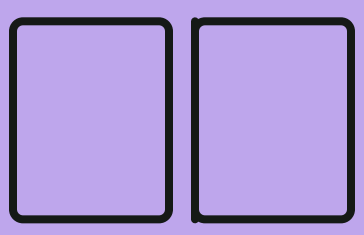

A simpler option to evaluate.

KEEP SEPARATION WHEN IT HELPS.

PARALLEL WORK

Independent tasks can run together.

FRESH CONTEXT

Give a task its own working space.

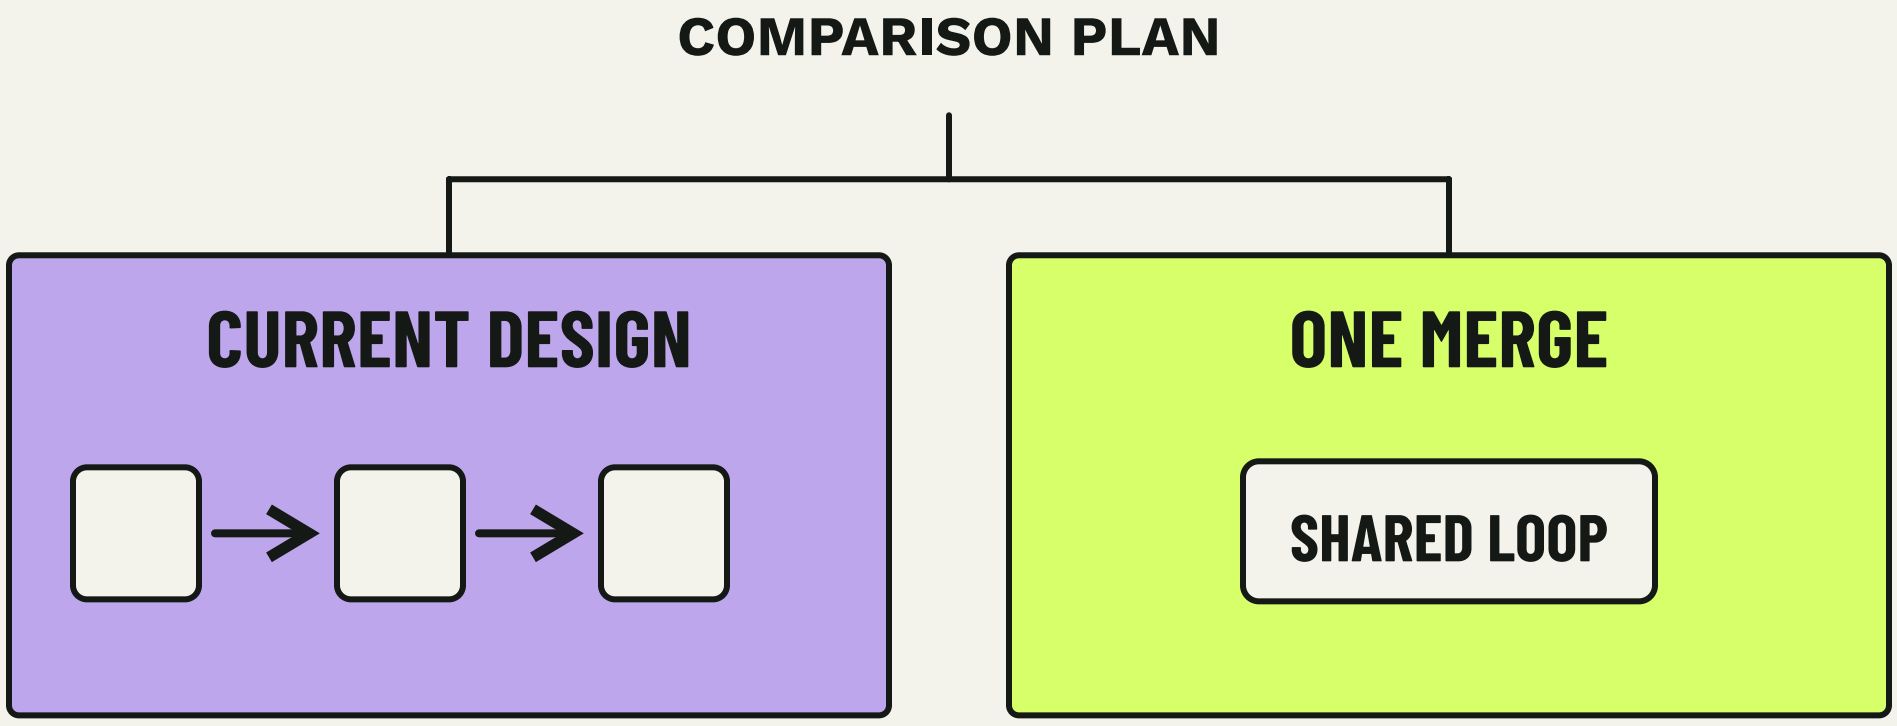

INDEPENDENT CHECKING

Define what the reviewer must verify.

Keep the boundary that helps the task.

LET THE OUTCOME DECIDE.

Same tasks. Same checks.

COMPARE

Quality / Time / Cost / Regressions

Keep what holds up on your workload.

WHAT DOES YOUR NEXT AGENT ADD?

- **Parallel work?**
- **Fresh context?**
- **Independent checking?**

Which handoff would you test first?
